NOTE.—The figures in the above Table (No. 6) give the amount of the actual net receipts derived from the Customs, Excise, Estate, &c., Duties, Stamps, and Taxes due to the Exchequer; and do not therefore correspond exactly with the figures in Tables Nos. 2 and 4, which give the payments made into the Exchequer "Exchequer Receipts," on account of these duties in each year.

* The net receipt of Property and Income Tax represents the amount of Tax actually collected within the year (irrespective of the year of assessment) less the amount of Tax refunded, &c., within the year (see note § on page 39). The amounts under the several schedules show the approximate net receipt of the Tax based on the assessments of property and income under each schedule.

No. 10.—AMOUNT of IMPERIAL TAXES

YEARS ended 31st March.	REDUCTIONS AND REPEALS OF TAXATION.	Date of Change.	Budget Estimate of Loss to Revenue.		Loss to Revenue in a normal year, as computed at the end of the year of change.
			For the Year in which the change took place.	For the complete Year.	
			£	£	£
1894-5	INCOME TAX:—				
	Schedule A. Relief under Lands and Houses	6th Apr., 1894	700,000	800,000	* 1,400,000
	Small Incomes. Extension of Exemptions and Abatements .		750,000	840,000	
	TOTAL		1,450,000	1,640,000	* 1,400,000
1895-6	CUSTOMS:—				
	Spirits, duty reduced from 11s. 4d. to 10s. 10d. per proof gallon, with proportionate decrease on articles made with spirits	1st July, 1895	—	—	† 66,000
	EXCISE:—				
	Spirits, duty reduced from 11s. to 10s. 6d. per proof gallon from 1st July, 1895	1st July, 1895	—	—	† 87,000
	TOTAL		—	—	153,000

NOTE.—The loss to Revenue caused by the reduction of Taxes is in most cases less than the gain which the reduction affords to the taxpayer, because the loss to Revenue is generally recouped by an increased consumption or use of the articles taxed consequent upon the lowering of the duty. Hence the loss is not necessarily the measure of relief to the taxpayer.

* Included a small estimate of sums yet to be reported.

† The sums inserted here are equivalent to the gain in 1894-5 (shown in that year), when the duty was correspondingly increased. But notwithstanding the decrease of the rate of duty there was an increase of 19,661*l.* in the Customs Revenue from Foreign Spirits, and of 334,000*l.* in the Excise Revenue from Spirits.

IMPERIAL REVENUE, EXPENDITURE, &c.

Boxes of mixed fruits, such as "Metz fruits, assorted" and bottles of "assorted fruits in syrup," containing articles liable to two or more distinct rates of duty, are assessed with duty at the highest rate on the whole weight, unless the various kinds of goods are packed separately, or in such manner that an account can be taken of each kind.

TOTAL EXPENDITURE	128,681,479	—	—	106,910,614	—

Note.—For expenditure by various Local Authorities, see Table No. 23, pp. 43-9.

* "Loan Charges" comprise repayments of principal made otherwise than out of sinking funds; payments to sinking funds, and interest on borrowed moneys.

† Table A includes, and Table B, excludes expenditure met out of loans under the Education (Provision of Working Balances) Act, 1903.

‡ The amounts expended in 1903-4 (and on the "maintenance" of schools in 1904-5) by school boards for areas not comprised in London or in county boroughs has not been ascertained, and is not included in the Table.

§ In these cases, the loan charges are understated—some unascertained sum is included under "Unapportioned loan charges." In the cases of "Hospitals" and "Libraries" the apportionment was more complete for 1902-3 than for later years.

|| In addition, the undermentioned sums, not included in the Table, were paid by the London County Council into their Consolidated Loans Fund (redemption of debt) account, for the future redemption of debt:

TOTAL EXPENDITURE.‡							

† The total expenditure given above slightly differs each year from that given in Table No. 23 (pp. 50-1), owing partly to the exclusion of the expenditure of Police Pension Funds (which is included in the previous Table), and partly to the educational returns being taken from different sources, whereby the above figures for 1902-3 and later years are inclusive of a portion of expenditure on account of higher class public schools which is excluded from the figures in Table No. 23.

‡ Inclusive of the cost of collection of school rates by Parish Authorities under the Poor Law Acts to 1898-9, excluded in subsequent years. The election expenses paid to County and Burgh Authorities under the same Acts are excluded in all years.

Note.—The figures in italics for the years 1899, 1900, 1901, and 1902 show the tonnage of vessels employed by Government in the conveyance of troops, stores, &c., from South Africa. These figures are not included in the figures in Roman type above.

* The figures for Plymouth and Southampton have been increased by the inclusion of vessels "calling off" the port to land or embark passengers or baggage. Such vessels, unless "brought to" in the immediate vicinity of docks or quays were excluded up to the end of 1906, but have been included from 1st January, 1907.

‡ The apparent changes in the area under grass in 1906 and later years as compared with previous years are largely due to greater care in classification in the Irish Agricultural Returns and to the transfer of some grass lands from one category to another, while certain areas previously included as pasture are now included in a new item, "grazed mountain land."

† A revision of the list of articles included under the head of Minerals was made in the year 1902, and the tonnages of Minerals and General Merchandise, and the receipts therefrom, are not strictly comparable with those given in prior years.

‡ Weight of Minerals and General Merchandise, the details for which cannot be separately distinguished.

¶ The decrease shown, on comparison with 1907, is apparent only—a duplication of 20 miles in the returns made to the Board of Trade having been corrected in 1908.

NOTE.—Most British Joint Stock Banks are registered under the Companies Act, 1862, and, consequently, the bulk of the Capital of such concerns is included in the figures given in the above Tables. With the exception of Municipal Tramways, the majority of the Companies working tramways in the United Kingdom are registered under the Companies Acts, and their Capital is accordingly also included. Railway Companies in the United Kingdom are not incorporated under the Companies Acts, but by special Acts of Parliament, as they need powers beyond those conferred by registration under the Companies Acts. Their Capital is, therefore, not comprised in these Tables.

* The Stannaries Court was abolished on the 1st April, 1897, under Act 59 and 60 Vict. c. 45.

NOTE.—For additional particulars to those given in above Tables respecting the British Army, see the General Annual Report on the British Army for year ended 30th September, 1908, Cd. 4,493.

* On the 1st January of the year following that stated. † The Militia strength is that at the date of inspection, except for the years 1900, 1901 and 1902, when the date was 1st July. The Reserve Division strength is that on the 1st July. The Militia Reserve disappeared before the inspection of 1907. ‡ At the date of inspection. § On the 1st November in each year.

|| The decrease between 1898 and 1899 is due to the number of men called out in the latter part of 1899 for active service. The number so called out form part of the Regular Army, but the increase in the number of the Regular Army, shown in the previous Table does not correspond with the decrease shown in this Table, because the average strength of the Regular Army for the year is shown and not the number at a given date as in the case of the Army Reserve.

¶ Includes 2,168 Volunteers.

** Strength on 1st October, 1908. The Militia was converted into the Special Reserve during 1908. On 1st October, 1908, there were also a number of Militiamen and men of the Reserve Division still serving on their old term of engagement.

For years prior to the year ended 31st July, 1907, reference should be made to Table No. 119 of the 'Statistical Abstract for the United Kingdom' for the years 1892-1906, which gives figures on the basis of the number of Depart- ments and Scholars earning grant.												

§ For years up to 31st July, 1900, the figures represent the percentage of average attendance to the number on the registers on the last day of the School Year. ¶ i.e. Cookery, Laundry Work, and the combined Domestic Subjects of Cookery, Laundry Work, and Housewifery. Where more than one of the three subjects were taught in the same School, the School is counted once for each subject. The figures for the small number of Boys in Seaport Towns who received instruction in Cookery are not included. ¶ i.e. Gardening and Dairy work. ** For the cause of the decrease in these figures, see the Annual Report of the Board of Education for 1905-6, pp. 27-28.

* No complete statistics are available prior to the year ended 31st July, 1896. The Elementary (Blind and Deaf Children) Act, 1893, came into force on 1st January, 1894. The statistics relate to the last day of the school year.

† No figures are available for years prior to the year ended 31st July, 1901. The first minute providing for grants on account of the education of defective and epileptic children was dated 28th February, 1900. The statistics relate to the last day of the school year.

‡ For years up to 31st July, 1903, the figures give the number of Scholars on account of whom grant was claimed. This explains the decrease after 1903 in the figures given in the last two columns.

§ For these years, boys and girls of the age of 15 and over are included in the two preceding columns.

* For years up to 31st July, 1904, reference should be made to the Statistics relating to Secondary Schools and Schools of Science contained in the Volumes of Statistics and the Annual Reports published by the Board of Education. The figures are not given here, because in many cases they include particulars which cannot properly be compared with those given in this table. The term "Secondary School" bears the meaning assigned to it in the Board of Education's "Regulations for Secondary Schools."

† With the exception of the figures relating to England for the year ended 31st July, 1908, the statistics give the number of scholars on 30th June of the year, or, in the case of a comparatively small number of schools, on the following 30th November. The figures for England for the year ended 31st July, 1908, give the number of scholars on 1st October, 1907, classified according to their ages on 1st August, 1907.

* The figures compiled for years up to 31st July, 1901, relate to the Evening Schools recognised under the Evening Continuation School Code of the late Education Department. They are, accordingly, not included, because they are not comparable with the figures given in this table, which relate to Evening Schools as defined in the Board of Education's "Regulations for Technical Schools, etc." (Ch. 2). The year ended 31st July, 1902, was a transitional year.

† Students on account of whom grants were paid for attendance at more than one School are counted once for each School; the number of individual Students on account of whom grants were paid was therefore less than the number given in the Table.

† The numbers given are the total numbers returned from each Union as relieved on the 1st January or the 1st July including those discharged from and admitted to the Casual Wards during those days. It is probable that they include a certain number who received relief in more than one Union on the same day.

‡ The figures in this column represent the net total of persons relieved, after making the necessary deduction in respect of certain persons counted twice in the preceding columns, such, for instance, as persons who received indoor as well as outdoor relief on the days mentioned.
